

CMPE 156 Assignment 2

Chuan-Yi Chan/ cchan88@ucsc.edu

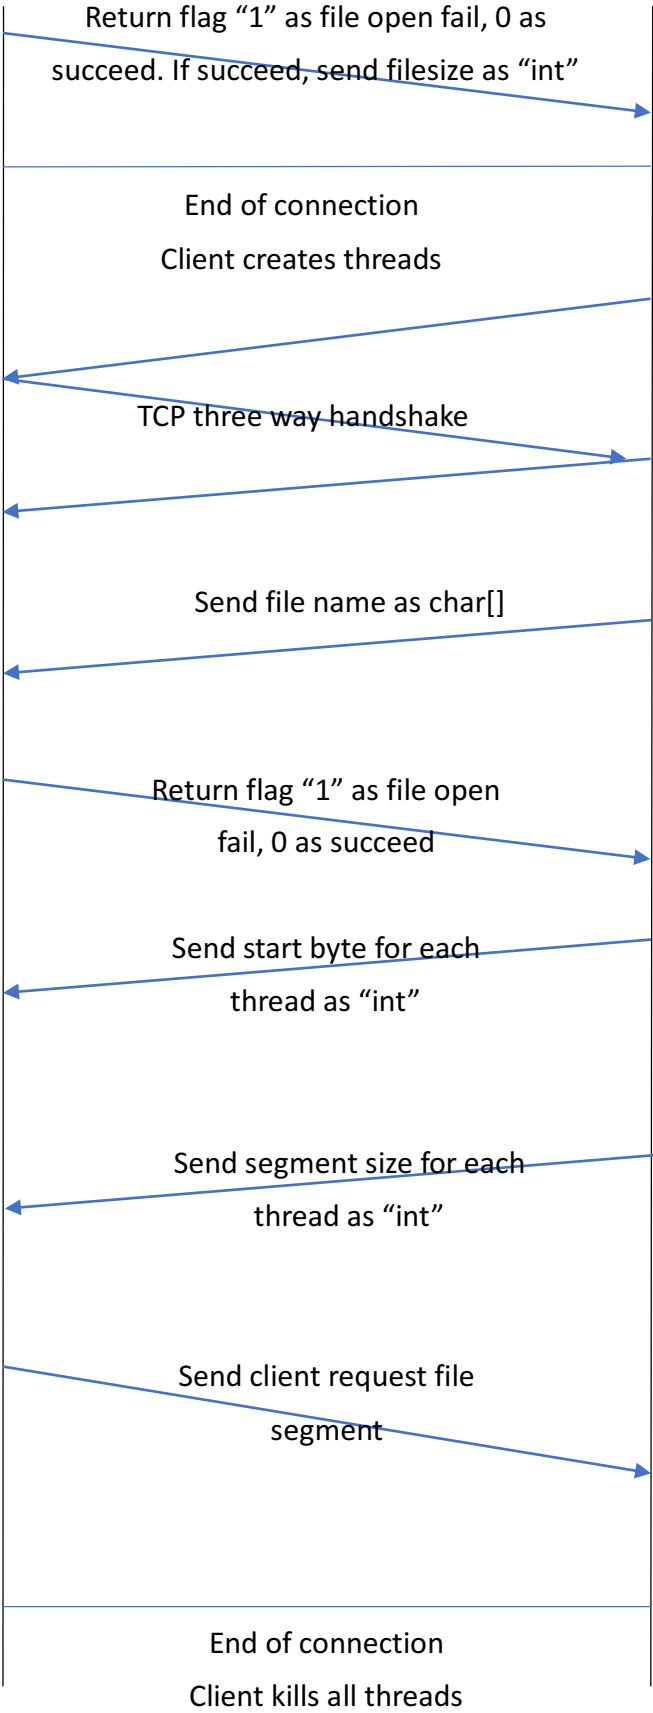

1. System flow chart

2. Data Transformation

If the file doesn't exist,
server will return error
message

Server read file with
received parameter and
send back to client

3. Test File:

Unfortunately I spent most of the time fixing the functionality. As a result there is not enough time for me to write a test script. I will just use the test sample provided by Professor Parsa.
